linkfill

Meeting your daily requirements

A high-quality product range that ensures optimal confidence

The Linkfill range was developed to meet the particular needs associated with the injection of contrast media.

From their design to market introduction, the quality of Linkfill extension lines reflect the expertise and know-how of MEDEX, a leading innovator in medical imaging for over 20 years.

Patient-side connection: Self-centring rotating system for easy placement and withdrawal of the extension line.

Colour-coding allows the patient side to be readily distinguished from the injector side.

Internal diameter of 2.3 mm to facilitate the flow of the contrast medium.

The injector-side connection is compatible with medical devices that comply with the ISO 594-1 and ISO 594-2 standards.

Fins are provided for a solid grip during connection.

Ease of use

Available in several lengths to adapt to variable spatial constraints between the patient and the injector.

Extension lines supplied in easy-to-open individual peel-pouches.

Packaged in a dispenser box for optimal accessibility and storage in your work environment.

Safety

Single-use extension lines, phthalate- and latex-free.

Packaged in individual tear-proof TYVEK® pouches that maintain product sterility.

Performance

Designed specifically to withstand a maximum pressure of 300 psi.

A comprehensive product range that makes the difference

| Reference | Features |
|------------------|--|
| Linkfill 25 CT | Straight extension lines for your CT scan exams |
| Linkfill 50 CT | |
| Linkfill 100 CT | Available in lengths of 25 cm, 50 cm, 100 cm and 150 cm |
| Linkfill 150 CT | |
| Linkfill C160 CT | Coiled extension line for your CT scan exams Length: 160 cm |
| Linkfill Y180 CT | Y-Shape extension line for your CT scan exams Length: 180 cm (currently in development) |
